

Our July iPod Nano winner is John M. of Roselle, IL.

-- I think too many of us do not understand the ramifications of the FDA taking over this industry, or government intervention in general. For instance, Australia ... When the government there took over the regulation of the sale of nutraceuticals, requiring "Medical Intervention", supplement sales dropped significantly. 85% of supplements that are manufactured in Australia are under government intervention. This killed the health food, and sports nutrition industry. That is why I have taken an active stand on keeping our industry strong in the U.S. That could happen here too if we get too complacent.

John was referred by his friend, John U. of Plainfield, IL.

-- I believe it is very important to support our Industry through the efforts of CSOFH. We work in an industry that supports and benefits people by improving their quality of health and life through natural supplementation. Our rights are at risk and we all need to stand together and fight for the rights of our threatened industry.
